

Learning, your way.

McGraw Hill has released a preview of its new mobile app to accompany the Access™ product suite.

The Access™ mobile app is a personalized interactive learning solution that makes studying easier and more efficient. Learners can search vetted and trusted medical content across a variety of mediums that best fit their learning needs, including:

- ▶ Video
- ▶ Podcasts
- ▶ Images
- ▶ Infographics
- ▶ Textbooks

Practitioners can learn how they want, when they want.

Key features include:

- ▶ **Find and save resources**
Search anything from symptoms to procedures and then favorite or save to a collection.
- ▶ **Refine by content type**
Target content and mediums to accommodate a variety of learning styles.
- ▶ **Search within content**
Find only the fine details one needs.
- ▶ **View figures and tables**
View content in its entirety, or just the images and tables.
- ▶ **View content offline**
Whether it's a case of bad Wi-Fi or simply being on-the-go, content can be viewed anytime, anywhere.
- ▶ **Curate new collections**
Save and build personal reference libraries, making it easier and quicker to find important and timely resources.
- ▶ **Personal dashboard**
Personalized dashboards give students the ability to tailor the Access™ experience to their needs.
- ▶ **Caters to your specialty**
The app features content from the full Access™ suite of sites, which spans the breadth of medical education specialties.

New features and updates will continue to be added to the app, allowing you to align the best parts of the desktop experience through your Access™ profile, while also adding and integrating features users have been requesting.

Speak with your Sales representative today to request a free demo of the new Access™ app from McGraw Hill!
