("Revenge porn" OR "Revenge pornography" OR "non-consensual pornography")

AND

(Anonym! OR Undisclosed)

AND

Intent!

Revenge porn victims are not automatically granted anonymity when pursuing charges because it is not classified as a sexual offense. This means that victims may face the possibility of being publicly named, which can put them off from reporting the crime.

Explanation

- ☐ Revenge porn is the distribution of sexual images or videos of someone without their consent.
- ☐ The anonymity of the internet makes it difficult to identify offenders.

- ❑ Victims of revenge porn can experience a range of consequences, including mental health issues, harassment, and fear of stalkers.
- ❑ Some campaigners call for revenge porn to be classified as a sexual offense so that victims would have the same automatic anonymity as victims of sex offenses.

Enhanced Engagement

It's simple: AR creates experiences that capture and maintain students' interest. When students interact with digital content in real-world environments, they develop a stronger connection to the subject matter. And when they have a solid foundation to build on, students develop a deeper commitment to their education and retain more information, longer.
